Bắc Từ Liêm, Hà Nội

Eduacation

Information technology

2022 - 2026

Hanoi University of Industry

GPA: 3.4

Skills

Frontend

HTML5, CSS3, PUG, SCSS, Bootstrap, TailwindCSS, Javascript, ReactJS, NextJS, Typescript,...

Backend

NodeJs, Expressjs, Mongoose, JWT,...

Database

SQL Server, MongoDB.

Career Objective

My goal is to build a solid foundation in software development and continuously improve my technical and problem-solving skills. I want to broaden my knowledge in both front-end and backend development and gradually grow into a Fullstack Developer in the future. I am always willing to learn new technologies and improve myself to create practical and effective solutions.

Work experience

CÔNG TY TNHH ELLNA **9/2025 - 12/2025**

Intern Fullstack

- Built and customized user interfaces using frontend technologies based on provided designs, ensuring responsive layouts.
- Developed RESTful APIs and handled data exchange between frontend and backend.
- Debugged issues, improved performance, and enhanced overall user experience through practice projects.

CÔNG TY CỔ PHẦN CÔNG NGHỆ TECH5S **3/2026 - 4/2026**

Intern Frontend

- Received Figma design files and implemented user interfaces based on provided specifications.
- Translated designs into responsive web layouts, ensuring consistency across different devices.
- Leveraged AI tools (Google Antigravity) to enhance development efficiency, including support for responsive design, 3D visuals, sliders, and interactive effects.
- Customized and configured UI components/libraries to match design requirements and improve user experience.

Personal project

Fullstack **7/2025 - 11/2025**

Website: Tour Travel

Developed a web application featuring authentication (registration, login, password recovery with automated OTP email verification), full CRUD operations, dynamic data rendering from the database, role-based access control, advanced filtering, sorting, search, pagination, shopping cart functionality, and online payment integration (ZaloPay, VNPay).

Fullstack **12/2025 - 3/2026**

Website: IT recruitment

Developed an IT job recruitment website with authentication (registration, login) and rolebased content display. Implemented CRUD functionalities for job postings and CV management, along with job search and pagination features. Built CV viewing and approval functionalities to support the recruitment process.
